

Screw Lock

for license plates

Screw Lock

With the Muschard screw lock system the mounting of license plates will be even safer. The head of the screw is protected by a plastic seal which will break apart by removal. Any manipulation can be seen through the broken screw lock immediately.

Our Screw Lock can be used with all commercial 5mm screws.

Highly recommended is the use of:

- one way screws
- rivets
- self-tapping screws

self-tapping screws

rivets

Price (EUR)/ 100 pcs.
